IMAGINE...

A learning space that facilitates future pedagogy

A space that ignites creativity, collaboration, communication and critical thought.

Welcome to NorvaNivel spaces.

The OECD Innovative Learning Environments Project (2010) characterised a future focused learning space as:

- + **Learner centered** – focus of all activities.
- + **Structured and well designed** – role of teachers in supporting inquiry and autonomous learning.
- + **Profoundly personalised** – sensitive to individual and group differences in terms of background, motivation, prior knowledge and ability.

- + **Inclusive** – sensitive to individual and group differences in terms of learning needs.
- + **Social** – learning is most effective when cooperative and in group settings.

With this in mind NorvaNivel have created a collection of spaces that facilitate 21st century schools in creating environments that allow learners every opportunity for greatness.

What to expect with us

- ✓ A **consultative approach** to space design and consultation.
- ✓ **High quality, locally manufactured product** designed specifically for current and future educational spaces.
- ✓ An **innovative and facilitative** approach to space.
- ✓ **An understanding of learners and pedagogy** through research and professional consultation.
- ✓ A company that **genuinely cares about creating** amazing learning spaces for all learners.

Our approach

Spending years working with educators has given us a great insight into the needs of future learning spaces.

A contemporary curriculum calls for a network of spaces that work both cohesively and concurrently whilst allowing for a balance between curriculum requirements and the flexibility to allow for exploration and discovery.

However, the ultimate learning space is different to every school, educator and learner.

We have set ourselves the challenge of creating a collection of spaces that will work in all learning environments, across all pedagogies whilst ensuring that all learners will be supported and inspired by their learning space.

Creating a
Network
of Spaces

Our aim is simply to facilitate and enhance **contemporary learning spaces** and environments that encompass a learner-focused approach to education and life.

Let's Build Your Space...

At NorvaNivel we have created thousands of successful learning spaces both locally and internationally.

Our consultative approach to learning space design and our commitment to understanding pedagogy and learning trends makes us **world leaders** in products and spaces for next generation learning environments.

We are committed to ensuring each and every space facilitates you in developing future focused learners.

What you need:

- ✓ Something to write with and on!
- ✓ A team to **brainstorm and share ideas** with (this can be students, teachers, parents and anyone with a vested interest in creating amazing learning spaces).
- ✓ A **passion** for teaching and learning.
- ✓ Once you have developed your learning master-plan it is time to create the **ultimate learning space.**

The team at
NorvaNivel.

So what is The Learning Network?

Every school or learning institution is made up of a **Network** of purposeful spaces that facilitate the learning continuum.

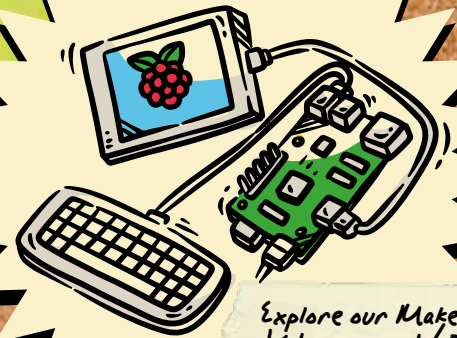

NorvaNivel have identified 5 main spaces that are required in all Next Generation Learning facilities.

Within The Learning Network...

There are purposeful and designated Spaces. These Spaces work cohesively to create an environment that facilitates future learning activities.

By understanding these types of activities and learning, we have identified how these activities are incorporated into the Network and have designed furniture and products that facilitate these activities and spaces.

MAKER CADDY

NorvaNivel are the first furniture and design company to create STEM relevant maker kits designed to help you build your maker space.

Our Maker Kits are constantly evolving and our kit options are not only curriculum relevant BUT have been designed and developed educators in collaboration with education consultant and Maker expert, Michelle Jensen. If you are looking to start building your maker space... we have the solutions for you.

In Addition to our STEM and CODE Kits we have identified that the key component of a Maker space is one in which storage is both plentiful and easily accessible. We have designed units that are both storage and additional work surface. The storage units come complete with Acoustic Work Surfaces and Gratnell Trays. All units are mobile and able to be reconfigured to create various size and height work surfaces.

STAND UP THINKING SPACE

*The most ergonomic learning space is one in which movement is encouraged and students have the opportunity to both **stand** and **sit**.*

We have developed products that encourage active movement and support dynamic learning spaces! Did you know that is proven that 20 minutes of exercise a day will increase brain activity and develop IQ... This is a proven fact and as such we can not ignore the need for these types of products in spaces! NorvaNivel Kinetic boards are a great solution to increased activity and combined with our high tables makes the perfect space for an active and dynamic collaborative learning environment.

NOTES

THE STORY CONTINUES...

*NorvaNivel are excited to continue
our journey into education.*

The ever changing needs of learners and educators are at the forefront of our minds when developing products and environments.

The education system is going through an exciting revolution as we change the way in which we learn.

The beneficiaries of these changes are going to be our future leaders and future innovators – we are honoured to be a part of the development and growth of greatness.

Our journey does not end on the last page of this catalogue... This is just the beginning.
